New brochure: WIKA solutions for water and wastewater applications

Klingenberg, October 2010.

With their new information brochure, WIKA put themselves forward as a competent partner for the major market of water and wastewater technology.

Alongside current solutions for pressure and temperature monitoring in water withdrawal and treatment plants, as well as in wastewater and process water systems, the 28-page brochure also offers an overview of the situation and the perspectives of global water supply.

The growing importance of drinking water from the sea is of equal significance as the use of process water or the production of ultrapure water for industrial plants.

The brochure can be downloaded from the company's website, www.wika.de, or ordered via e-mail through info@wika.de.
